Severe Effects:

Main road is in East and basement is constructed in the whole building. According to vastu road is also the portion of house. Causes East portion become heavier than West. This results in serious ailments among men folk, insecurity feelings, loss of name & fame, financial stringency, court cases problems with administration, being child less or abortions etc.

Ground Floor (After Vastu Remedies)

As shown in the figure erect pillars under the balcony, on each floor up to the terrace so that weight on East walls is reduced. Or else complete balcony may be demolished.

1. Cut the concrete between wall and stair case (at least 3 inches) thus separating the two.
2. In no case shall the stair case abut the North & East wall.
3. To withstand the weight of stair case erect a wall at least 3 inches away from the main wall.

Fill the basement with sand & level the ground. It is best to maintain floor level 2.5 feet high than road.

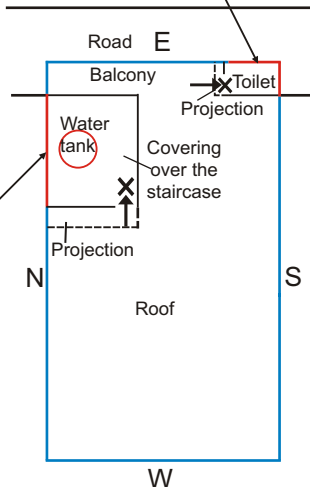

Terrace (as is now)

Severe Effects:

Toilet is adjoining SouthEast corner, causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Severe Effects:

Stair case cover is abutting North-NorthEast wall and water tank is over it, causing all family members specially earning members being always worried, unwell, having no progress, financial stringency, no recognition in society and first & fourth child (if female) having troublesome life and marital discords.

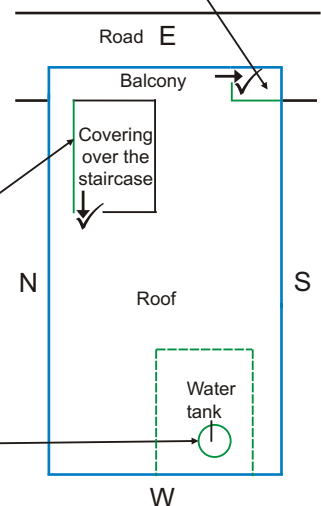

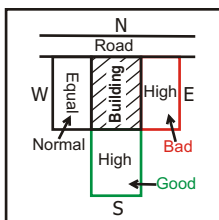

Terrace (After Vastu Remedies)

1. Remove the roof of the toilet, the adverse effects being eliminated.
2. If this is not possible, then demolish the toilet totally.
3. New toilet may be constructed adjoining South or West wall as shown by the dotted lines.
4. Such construction should be away from the corners by at least 3 feet.

1. Remove the roof of stair case cover, the adverse effects being eliminated.
2. If however, stair case cover needs to be covered, the same should be shifted by at least 3 feet from North wall as shown. It would reduce the adverse effects.
3. To remove the adverse effects totally, new stair case and stair case cover may be constructed adjoining West wall as shown by the dotted lines.
4. The such construction should be away from the corners by at least 3 feet.

Shift the water tank to SouthWest having at least 3 feet of gap from corners as shown.

Vastu effects on the residents of the shaded building :

Road to the North of the building resulting in female folk being healthy & intelligent. Southern neighbor's house is high causing self confidence among female folk. Eastern neighbor's house is high causing low self esteem among males. Western neighbor's house is at same level, no adverse effect.

On the Eastern side there are constructions thus causing energy flowing to this house. However South & West neighbor's constructions also receive this energy. Hence vastu adverse effects being average.

Septic tank is towards West-NorthWest causing men folk being unwell, indebtedness, fights & disputes, mental worries, insolvency, court cases, problems with administration and third & seventh child (if male) having troublesome life & marital discords.

Minor Effects:

Stair case is abutting North wall causing financial stringency, female folk being unwell, irritable temper and loss of name and fame.

Minor Effects:

Loft is abutting SouthEast corner causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life.

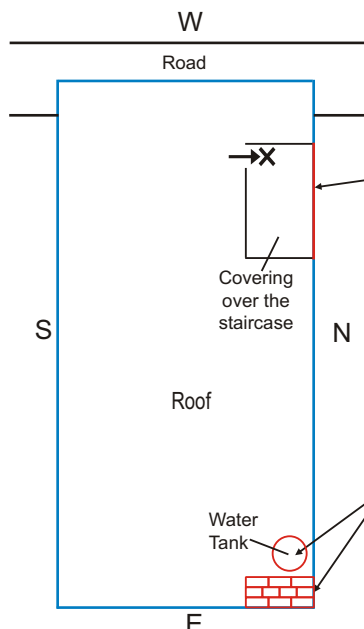

Terrace (as is now)

Severe Effects:

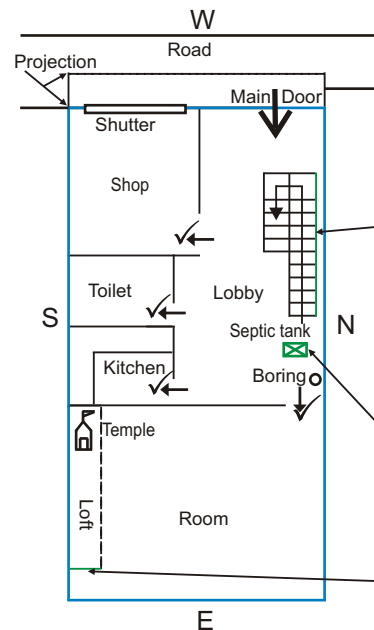

Stair case cover is abutting North-NorthWest wall causing financial stringency, female folk being unwell, indebtedness, fights & disputes, mental worries, insolvency, court cases, problems with administration and third & seventh child having troublesome life & marital discords.

Severe Effects:

Water tank is on NorthEast corner as also some weight, causing all family members specially earning members being always worried, unwell, having no progress, financial stringency, no recognition in society and first & fourth child having troublesome life and marital discords.

Ground Floor (After Vastu Remedies)

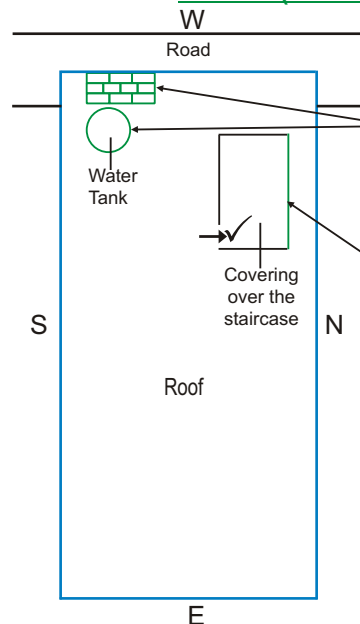

1. Cut the concrete between wall and stair case (at least 3 inches) thus separating the two.
2. In no case shall the stair case abut the North wall. In no case should the stair case be adjoining North & East walls.
3. To stand the weight of stair case erect a wall at least 3 inches away from the main wall.

Shift the Septic tank to the place shown in North. Fill the earlier tank with sand & level the ground.

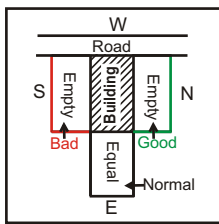

Loft & almirah be shifted as shown.

Terrace (After Vastu Remedies)

Shift the water tank & weight to SouthWest having at least 3 feet of gap as shown.

Shift the Stair case cover away from North wall at least 3 feet of gap as shown.

Vastu effects on the residents of the shaded building :

Road to the West. East neighbor's construction is same level, no effects are indicated. Open area in North causing female folk having sound health. Open area in South causing low self confidence among females.

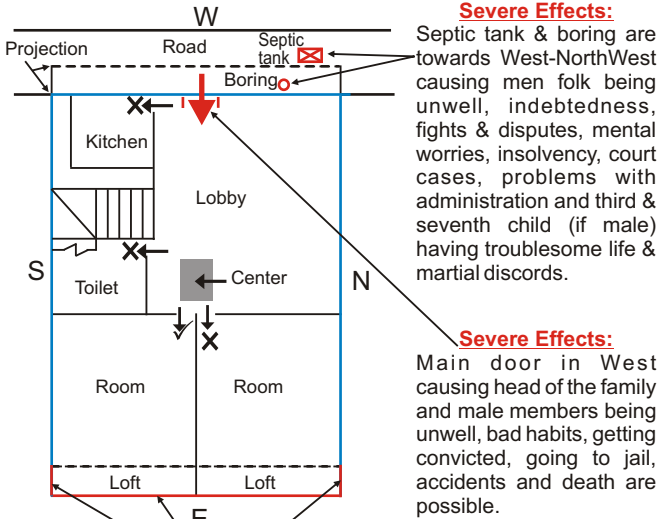

Consequent to construction on East side, energy does flows. No construction in South & West so no energy out flow. Thus adverse vastu effects are minimized.

- ✓ Door (Right)
- ✗ Door (Wrong)

Adverse vastu effects on the whole building :

On the ground floor Septic tank is towards West-SouthWest as also street thrust. Boring towards West-NorthWest. Almirah adjoining East wall and SouthEast corner. Consequent to open area in North, this area gets constricted. No vastu defect on the terrace. In this building head of the family, first & fifth child (if male) would suffer serious ailments, bad habits, being convicted, going jail and accidents are indicated. Female folk would be having minor ailments & have irritable temper. Financial stringency, indebtedness, fights & disputes, mental tension and problems with administration are indicated. Third & seventh child (if male) having severe troubled life and marital discords, if female minor irritations in life.

Ground Floor (as is now)

Severe Effects:

Boring is towards West-NorthWest causing men folk being unwell, indebtedness, fights & disputes, mental worries, insolvency, court cases, problems with administration and third & seventh child (if male) having troublesome life & marital discords.

Severe Effects:

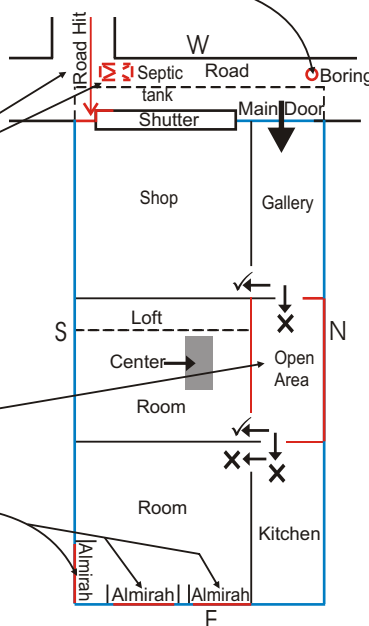

septic tank is towards West-SouthWest & as well as street thrust also, causing head of the family, first & fifth child being unwell, bad habits, getting convicted, going to jail, accidents and death are possible.

Minor Effects:

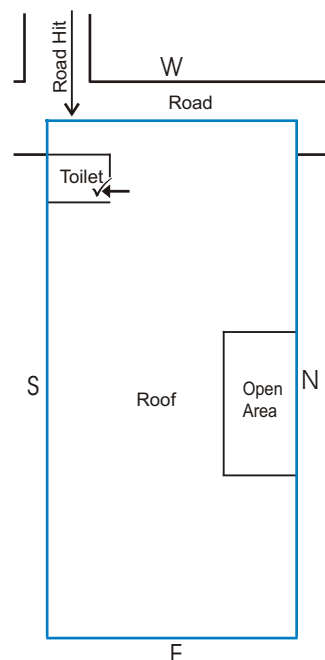

Open space in North resulted constriction of the same, resulting in financial stringency, female folk being unwell, irritable temper and loss of name and fame.

Minor Effects:

Almirah is adjoining Eastern wall & SouthEast corner, causing serious ailments among men folk, insecurity feelings, loss of name & fame, problems with administration, being child less, abortions and problematic life to second & sixth child.

Terrace

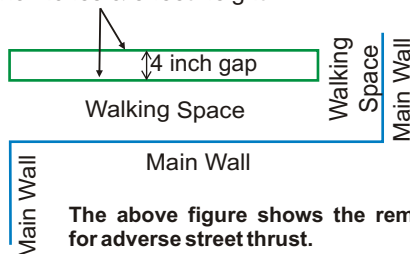

No vastu defects on roof.

Ground Floor (After Vastu Remedies)

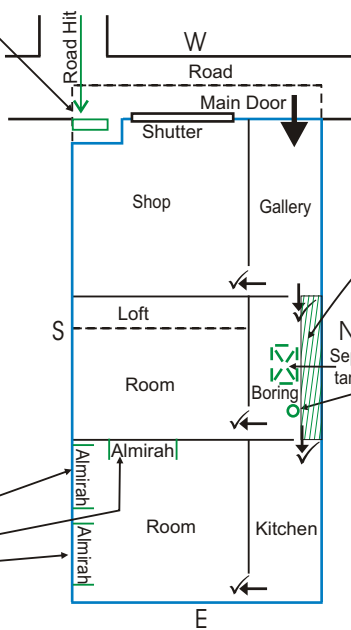

Facing the street thrust completely erect two wall at least 4.5 inches thick each and 8 feet height. Gap between these walls should be at least 4 inches. Walking space should be provided between these walls and main wall.

Wall thickness at least 4.5 inches & 8 feet height

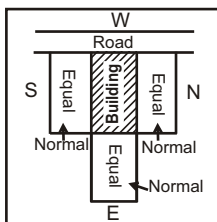

The above figure shows the remedy for adverse street thrust.

Almirah be shifted as shown.

Cover the open space as shown (shaded area). For this purpose construction material may be similar than that of the kitchen's roof material.

Shift the Septic tank & boring to the place shown in North. Fill the earlier tank & boring with sand & level the ground.

Vastu effects on the residents of the shaded building :

Road to the West. East neighbor's construction is equal, causing no effect. North neighbor's construction is equal, causing no effect. South neighbor's construction is equal, causing no effect.

Consequent to construction on North & East side, energy does flow. However energy flows out towards South also there being constructions. Hence adverse vastu effects are minimized.

East corner of balcony is constricted causing serious ailments among men folk, insecurity feelings, loss of name & fame, financial stringency, court cases problems with administration, being child less or abortions etc.

Minor Effects:

Stair case is abutting East-SouthEast wall causing male folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

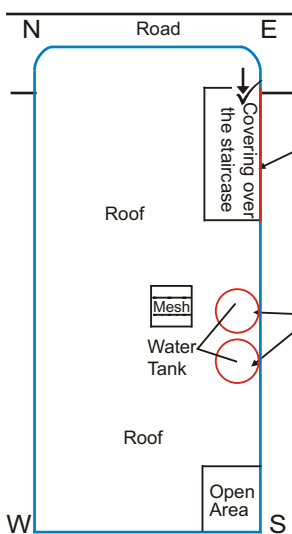

Minor Effects:

Kitchen slab is adjoining NorthWest wall, no peace in family and non compatibility among couples.

Severe Effects:

Boring is in South and open space also, causing female folk in particular first lady being unwell, loss of name & fame, irritable temper, becoming stubborn and mental worries.

Terrace (as is now)

Severe Effects:

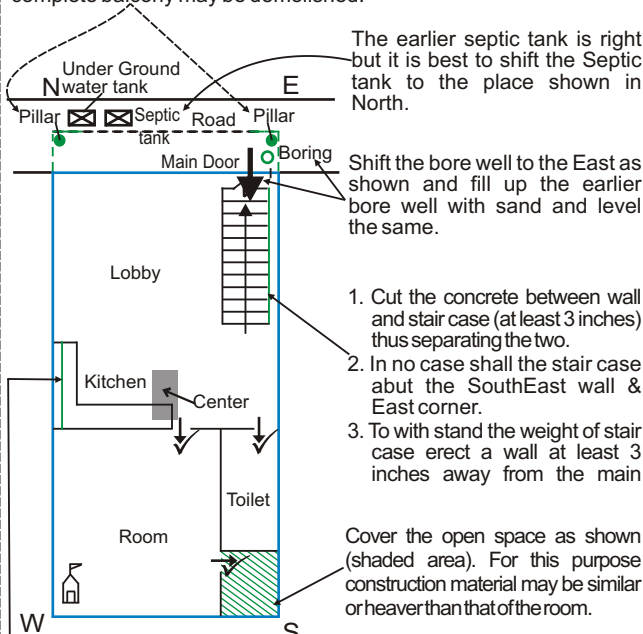

Stair case cover is adjoining East-SouthEast wall causing male folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Severe Effects:

Water tanks are adjoining SouthEast wall causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Ground Floor (After Vastu Remedies)

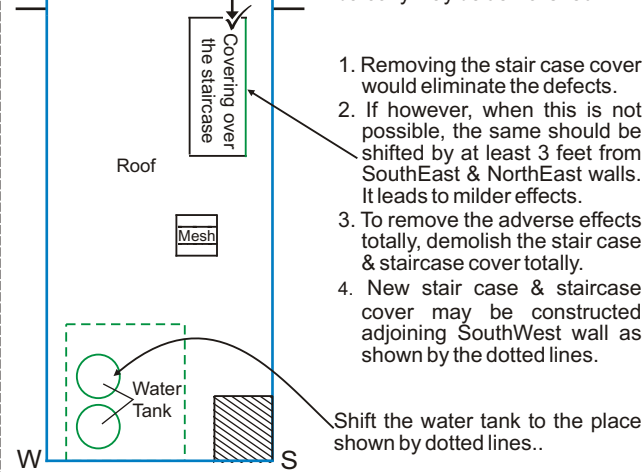

As shown in the figure erect pillars under the balcony, on each floor up to the terrace so that weight on North walls is reduced. Or else complete balcony may be demolished.

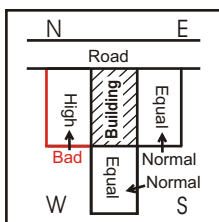

Cut the Kitchen slab such that it is away from the wall by at least three inches. In no case should this abut NorthWest wall.

Terrace (After Vastu Remedies)

As shown in the figure erect pillars under the balcony, on each floor up to the terrace so that weight on North walls is reduced. Or else complete balcony may be demolished.

Vastu effects on the residents of the shaded building :

Road is towards NorthEast, causing men folk & first child enjoying sound health. SouthWest neighbor's construction is at equal level, causing no effect. SouthEast neighbor's construction is at equal level, causing no effect. NorthWest neighbor's construction is at a higher level, causing female folk having low self confidence.

Adverse vastu effects on the whole building :

On the ground floor Stair case is adjoining SouthEast wall. Bore well is towards SouthEast. Wall is constructed in the prime central area. On the terrace stair case cover is adjoining SouthEast wall. Toilet is on East corner. Some weight is in North corner. In this building complete family being unwell, men folk having short temper, low self esteem, having no male issues, abortions, financial stringency, indebtedness, fire & theft hazards, fights & disputes, mental tension, court cases and problems with administration are indicated. Second & sixth child having severe troubled life & marital discords.

Ground Floor (as is now)

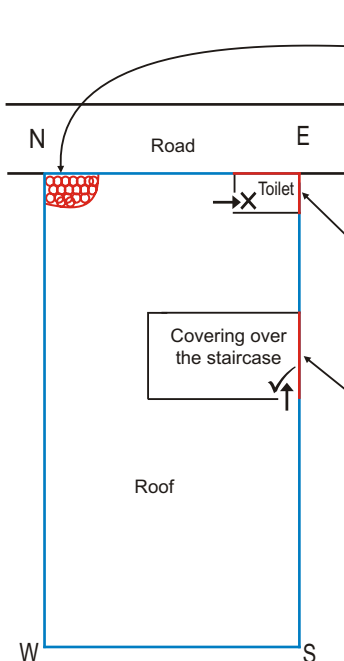

Severe Effects:

Stair case is adjoining SouthEast wall and boring is also in SouthEast causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Construction in the prime central area has mild adverse effects.

Terrace (as is now)

Severe Effects:

Some weight is in North corner, causing financial stringency, female folk being unwell, irritable temper and loss of name and fame.

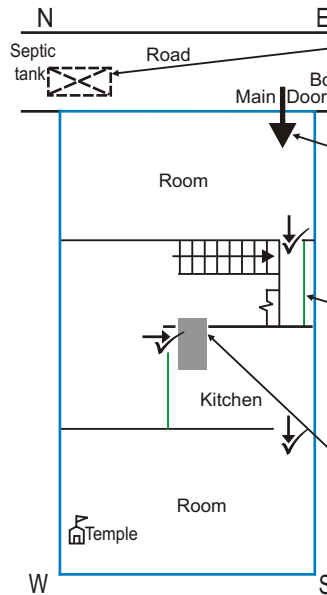

Severe Effects:

Toilet is adjoining East corner causing serious ailments among men folk, insecurity feelings, loss of name & fame, financial stringency, court cases problems with administration, being child less or abortions etc.

Severe Effects:

Stair case cover is adjoining SouthEast wall causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Ground Floor (After Vastu Remedies)

The earlier septic tank is right but it is best to shift the Septic tank to the place shown in North.

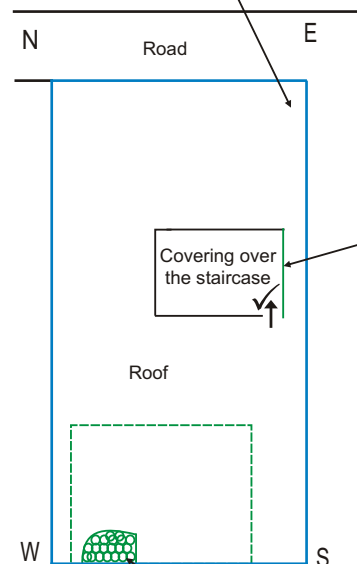

Shift the main door & bore well to the East as shown and fill up the earlier bore well with sand and level the same.

Cut the concrete between wall and stair case (at least 3 inches) thus separating the two. In no case shall the stair case abut the SouthEast wall.

Construction in the prime central area has mild adverse effects.

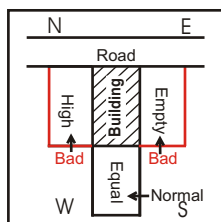

Terrace (After Vastu Remedies)

1. Remove the toilet as shown.
2. New toilet may be constructed adjoining SouthWest wall as shown by the dotted lines.

1. Removing the stair case cover would eliminate the defects.
2. If however, stair case cover needs to be cover, the same should be shifted by at least 3 feet from SouthEast walls, it leads to milder effects.
3. To remove the adverse effects totally, demolish the stair case & staircase cover totally.
4. New stair case & staircase cover may be constructed adjoining SouthWest wall as shown by the dotted lines.

Shift the weight to SouthWest having at least 3 feet of gap as shown.

Vastu effects on the residents of the shaded building :

Road is towards NorthEast, causing men folk & first child enjoying sound health. SouthWest neighbor's construction is at equal level, causing no effect. SouthEast is empty & NorthWest neighbor's construction is at high level, causing female folk having low self confidence.

Consequent to neighbor's constructions in NorthWest, this building would receive vastu benefits but consequent to vastu defects, energy would flow out to NorthWest & SouthWest construction too. Hence adverse effects of vastu defects being severe.

Some weight is on Eastern corner, causing serious ailments among men folk, insecurity feelings, loss of name & fame, financial stringency, court cases problems with administration, being child less or abortions etc.

Severe Effects:

Toilet is adjoining South-SouthEast wall, causing female folk being unwell, indebtedness, fights & disputes, mental worries, fire & theft hazards, court cases, problems with administration and second & sixth child having troublesome life & marital discords.

Terrace (After Vastu Remedies)

1. Remove the roof on the toilet, the adverse effects being eliminated.
2. If this is not possible, then demolish the toilet totally.
3. New toilet may be constructed adjoining SouthWest wall as shown by the dotted lines.
4. The such construction should be away from the corners by at least 3 feet.

Shift the weight to SouthWest wall as shown by the dotted lines.

Vastu effects on the residents of the shaded building :

Road is towards SouthEast. NorthWest is empty, female folk having low self confidence. NorthEast neighbor's construction is at higher level, causing men folk and first child having low self confidence. SouthWest neighbor's construction is at equal level causing no effects.

Consequent to neighbor's constructions in NorthEast, this building would receive vastu benefits but consequent to vastu defects, energy would flow out to SouthWest. Hence effects of vastu defects being minimal.
